Tracking and forecasting visitor volume rely on multiple inputs measuring local and national performance and global economic and political variables. Volume estimates are based upon best available data at the time of the analysis and are subject to revision as new data become available. Country rankings are based upon 2014 results. (r) revised (as of September 25, 2015)

¹ Overseas visitation excludes Canada and Mexico. ² People's Republic of China (excluding Hong Kong)

*Volume estimates are based upon small samples. Blank spaces indicate that data were not available for that particular market in that year. Totals may not sum due to rounding.
